PREFACE	11
ACKNOWLEDGMENTS	11
1. The significance of medical communication	15
Why does a physician need good communication skills?	17
Should we learn communication and is it even possible?	18
Does a doctor have time to communicate well?	19
2. Doctor-patient consultation	25
What are the communication objectives of the doctor-patient consultation?	27
How should the doctor begin a consultation?	28
How can gathering information be thorough and effective?	31
How should the physician communicate while examining the patient?	34
How can the doctor properly inform the patient and enhance their adherence?	35
How should the doctor end a consultation?	38
How can the doctor structure a consultation?	39
How can the physician express their attentiveness and empathy?	39
3. Promoting lifestyle change	47
How much of a problem is a lifestyle that is detrimental to health?	49
What can a doctor with little time do to promote lifestyle change in patients?	
The 5As and the 5Rs method	49
How can the physician increase patient motivation? The motivational interview	52
Why is knowing the process of change important? A model of the stages of behavior change	58
4. Communication options for developing health literacy	65
What is health literacy?	67
How prevalent is low health literacy?	67
Why does a low level of health literacy pose a problem?	68
How can health literacy level be assessed?	68
What are ways to improve health literacy?	69
5. Communicating risks of treatment	77
How do we perceive various risks?	79
What is risk communication?	80
What methods can aid the realistic assessment of risks?	80
In the spotlight: Anti-vaccination	82
6. Shared decision making	87
What is shared decision making?	89
When can shared decision making be necessary?	90
To what extent do patients want to participate in decisions related to their treatment?	90
How can shared decision making be achieved in clinical practice?	91
What are the difficulties involved in shared decision making?	92
What are some decision aids that can foster shared decision making?	93
What are the benefits of implementing shared decision making?	94
7. Suggestive communication in medical practice	97
What is suggestion?	99
Why are patients susceptible to suggestion?	100
How does the use of positive suggestions change doctor-patient communication?	101
What is rapport and why is it essential?	103
What are some effective techniques for suggestion in medical communication?	103
What evidence supports the effectiveness of suggestive communication?	105

8. Communicating with patients of different age groups	109
What are some challenges in communicating with child patients?	111
What can facilitate communication with children?	113
What characterizes communication with adolescents?	116
How should the doctor communicate with parents?	117
What are some challenges in communicating with the elderly?	118
How should the doctor communicate with elderly people?	120
9. The doctor's cultural competence	125
Why is cultural competence necessary for a doctor?	127
How does culture affect the doctor-patient relationship?	128
How do cultural differences affect doctor-patient communication?	130
What methods can help bridge cultural differences?	131
10. Communicating with patients using complementary and alternative treatments	137
Where are the boundaries of conventional medicine?	139
Why are complementary and alternative methods popular?	141
Why do doctors and patients fail to talk about these issues with each other?	142
How should the doctor speak with their patient concerning CAM treatments?	143
In the spotlight: Where can one find reliable information on CAM methods?	144
Why is it beneficial to communicate about CAM treatments?	145
11. Communication about functional symptoms	149
Why do people who are deemed healthy by their doctors receive so many diagnoses?	151
How do functional symptoms develop and what sustains them?	152
In the spotlight: Medical student's disease	154
How can somatization be recognized?	155
What to do if the patient, in fact, has a rare and undiagnosed illness?	156
What mistakes are to be avoided when treating somatizing patients?	157
In the spotlight: The role of shame in somatization	158
How to treat functional symptoms within the framework of somatic medicine?	159
What can be done if this approach does not work?	162
12. Communicating about intimate issues	167
When should the doctor talk to patients about sexual issues?	169
Why do patients and doctors often avoid sexual topics?	170
How should the doctor converse about sexual issues with their patient?	170
How can the doctor help resolve sexual problems?	173
What are the characteristics of communication with people belonging to sexual minorities?	175
In the spotlight: Communicating about incontinence	178
13. Communicating with tense, hostile people	185
Why can healthcare be considered a hazardous workplace?	187
How can hostility and aggression be prevented?	188
How can threatening situations be detected in time?	190
How can proper communication help manage hostility?	192
14. Communicating with people with mental disorders	199
What are the warning signs of depression?	201
How can one recognize suicidal intent in another person?	203
What should the doctor do if a risk of suicide?	205
How can doctors identify signs of anxiety and help an anxious patient?	207
How can a doctor spot warning signs of addiction in patients and what can be done to help them?	209
What methods can aid communication with patients with dementia?	213
In the spotlight: How should the doctor react to the delusions and hallucinations of schizophrenic patients?	214

15. Breaking bad news	221
What counts as bad news?	223
Does it need to be said?	223
Who should deliver the bad news and when?	223
How should the diagnosis of a severe, incurable disease be communicated to the patient?	225
What are some things the doctor needs to do after the conversation?	229
How should one react to difficult questions?	229
How should the death of a patient be communicated?	231
In the spotlight: Communicating with relatives about organ donation following brain death	233
How should the doctor deliver the news of a congenital anomaly?	234
16. Aspects of communication in patient safety	239
How frequent are mistakes in healthcare and how serious are their consequences?	241
How does communication relate to medical errors?	242
What communication methods can increase patient safety?	243
In the spotlight: How can using a single sheet of paper save lives?	244
How can medical errors be communicated?	248
17. Communicating with people with disabilities	257
What is disability?	259
Which words to use and which to avoid?	260
How should one communicate with people who have disabilities?	262
Hearing impairment	262
Visual impairment	265
Deafblindness	266
Physical disability	267
Speech impairment	267
Autism, intellectual disability, and severe cumulative disability	268
In the spotlight: Sign language	270
18. Communication with the victims of abuse	275
What do we mean by the concepts of abuse and neglect?	277
How frequent is abuse?	278
What should the doctor do if their patient is a victim of abuse?	278
What signs can be associated with abuse?	279
In the spotlight: Aftereffects of sexual abuse	281
How can one initiate a conversation about abuse?	281
What kind of support can the doctor provide to victims of abuse?	283
What should be documented and how?	284
In what cases should the doctor report abuse?	285
What should a doctor avoid doing if they encounter a victim of abuse?	285
How is the support of abuse victims changing?	286
19. E-health: use of technological tools in health communication	291
How is the doctor-patient relationship transformed by modern technology?	293
During consultations with a patient, how should the doctor use the computer?	295
How should the doctor relate to their patients browsing the internet for information?	297
What positive and negative effects does the telephone have on doctor-patient communication?	298
How can email be used in the doctor-patient relationship?	300
What new opportunities for communication are created by social media?	303
